

## Plasma and LCD Transport & Display Cases

### Escort Series LCD EZ-Haul

This popular model features space for your monitor, as well as giving you the option for an accessory compartment below. Push lined foam, and a custom fit ensure that your monitor will arrive as it left, and the EZ-Haul option makes it a breeze getting where you're going.

### AT Series

Lighter duty and lower cost, the AT Series is specifically designed to meet the needs of production companies, corporations, and universities that tend to move a monitor over short distances, and leave it in the hands of staff who know how to handle it. This case is ideal for local and regional transport.

### Escort Single Case

Built to ATA Spec 300, this case features a standard storage compartment for your stand, and accessories. This model is designed for motor and/or air freight, and is made to stand up to the rigors of the road. This model is available for 37" to 60" displays, in either 3/8" or 1/2" ply construction.

### Escort Wedge Case

This unique, patented wedge design discourages the common practice of flipping these cases on their side or top in transit, thereby increasing the life expectancy of the display itself. Offered in both 3/8" and 1/2" construction, with locking casters standard, this case is ideal for rental companies.

### Escort Case in Case

The Calzone Escort Case in Case design provides maximum protection for your monitor, as well as enough accessory space to bring along everything you'll need. Available for 37" to 60" displays with a 1/2" outer, and 1/4" inner case, you can depend on our Case in Case.

### Escort FL-16 Transport/Display Case

The FL-16 is the new alternative to heavier, more expensive pneumatic and electric lift designs. This case can safely transport and display your monitor, saving you time and money. Available for 32" to 50" displays.
