NEW PRODUCT RELEASE BULLETIN

The Calzone/Anvil Case Co. is pleased to announce the addition of our new Touring Series Rack Case to our complete line of Rack Cases solutions. This case is made to ensure that you never lose another rack lid. The lids store in the case, either on the side or the top, and stay that way until it's ready to ship. No more trying to figure out where to put your lids, or which one goes with which rack. This is the easiest way to safely transport, setup, and use your gear.

This shockmounted heavy duty rack is available in 1/2" ply construction, and the inner shell comes in 3/4" birch. Also standard are 4" x 2" HD Casters, and stacking caster cups. Please call us for more information and availability.
